Main Achievements

C# Project [2018 - 2018]

- Created an app that had to be able to login to an account with verification and security checks.

Database Project [2018 - 2018]

- Created a fully functioning database and front-end GUI for the South African Hunting Union to keep track of members, registrations, sales and stock, with a live update function for a scoreboard and charts to show member activity and event participations. This was a very successful team project, we were approached by the hunting union asking if we would like to sell them the program, but with strict rules of the university we decided to decline that offer.
